

CATHERINE ITALIANO

Catherine Italiano is the National Manager of the Risk Analysis and Toxicology Section in the Animal Feed Division at the Canadian Food Inspection Agency in Canada. This government agency administers the federal *Feeds Act and Regulations*. Catherine has been involved in administering the safety/toxicology portion of the feed program for over 17 years. She is involved in developing guidelines for the safety assessment of new feed ingredients and setting safety standards for feeds and contaminants in feeds and also initiated the biotechnology program for novel feeds in Canada. Catherine works on risk assessment and management strategies for contamination issues that arise from feed and is currently drafting new regulations for the control of living animals which have been contaminated with toxic substances. She has been a Canadian representative at many international fora including the Codex Ad Hoc Task Force on Animal Feeding in 2001, the FAO/WHO Expert meeting on Animal Feed Impact on Food Safety in 2007, and biotechnology meetings including APEC and ASEAN. Catherine graduated with a BSc in Cell, Molecular and Developmental Biology from McGill University, and a Graduate Diploma in Ecotoxicology from Concordia University, both in Montreal. She worked for a number of years in research labs primarily in the field of molecular and developmental biology before moving to the regulatory world of feed safety.
